

RESOLUTION NO. 3482**A RESOLUTION OF THE TOWN COUNCIL OF THE TOWN OF SAN ANSELMO IDENTIFYING ESSENTIAL ELEMENTS TO BE INCORPORATED INTO FUTURE POLICIES AND PROGRAMS UNDERTAKEN BY THE CALFED PROCESS**

WHEREAS, the health of the San Francisco Bay/Delta estuary and the diverse ecosystems it supports are fundamental to the environmental well being of the entire Bay Area; and

WHEREAS, much of the Bay Area's economic vitality is supported by the Bay/Delta estuary, including industries such as tourism, recreational and commercial fishing; and

WHEREAS, since 1994 the Federal Government and the State of California, in conjunction with agricultural, urban and environmental stakeholders, have undertaken an effort to address the remarkably complex water resource issues of the Bay/Delta ecosystem through a process known as CalFed; and

WHEREAS, in the CalFed process the current public comment period for the Draft Programmatic EIR/EIS provides a critical opportunity for input on the issues affecting the San Francisco Bay/Delta estuary.

NOW, THEREFORE, BE IT HEREBY RESOLVED, that the Town Council of the Town of San Anselmo does hereby identify that the following essential elements must be incorporated into future policies and programs undertaken by the CalFed process:

- ♦ A guarantee that there will be adequate freshwater flows into the Bay – The San Francisco Bay/Delta estuary's historical freshwater flows have been reduced by half. Currently there exists a need for science-based standards that establish minimum flows of freshwater into the Bay. Adequate flows will benefit the entire estuary in diverse ways, including improving water quality, supporting biological diversity, and the health of all of the Bay/Delta estuary's ecosystems.
- ♦ Water conservation by all users – Equitable water conservation practices must be required and enforced for all users throughout California. Managing demand through conservation practices and greater water use efficiency can eliminate or substantially reduce the need to construct new storage facilities. Until conservation practices and demand management have been implemented and monitored, the construction of new storage facilities should not be initiated.

- ♦ A fair share of funding for Bay Area environmental restoration efforts – The EPA's Comprehensive Conservation and Management Plan (CCMP), BCDC's San Francisco Bay Plan, and the RWQCB's Bay Basin Plan all establish numerous beneficial measures that must be taken to protect and restore habitat and improve fish and wildlife in the Bay/Delta estuary. Of the most recent funding package only 5% came to projects in the region. Funding to implement these recommended programs must be brought up to levels that are appropriately proportional to budgets for environmental restoration in other parts of the State.

I hereby certify that the foregoing Resolution was duly passed and adopted at a regular meeting of the San Anselmo Town Council on the 14th day of September, 1999, by the following vote, to wit:

AYES: Breen, Chignell, Hodgens, Kroot, Overberger

NOES: (None)

ABSENT: (None)

Attest:

Debra Stutsman
Debra Stutsman, Town Clerk
